INVITATION TO ATTEND

On behalf of the Local Organising Committee I invite you to attend 19th International Zeolite Conference to be held in Perth Western Australia 7-12 July 2019.

Western Australia is a resource rich state and Perth is the perfect city to host IZC19. The program format will be similar to previous conferences, however the committee plan to complement your visit with field trips to mine sites and processing plants both in Western Australia and also on the eastern sea board where many delegates may wish to enter from.

Perth is a vibrant cosmopolitan city that continues to grow and thrive and only less than 2 hours' drive either north or south we have contrasting landscapes that demonstrates the natural beauty of Western Australia.

We look forward to hosting you in July 2019 and encourage you to make the most of this opportunity by taking the time while here to visit many other parts of this great country, the parts that you have always wanted to visit.

Prof Moses Oludayo Tade

Chair Local Organising Committee, IZC 19
Dean of Engineering, Curtin University
Perth, Western Australia

PROGRAM THEMES

- **Synthesis**
- **Characterisation**
- **Computational and theoretical**
- **Investigations**
- **Applications:**
 - Adsorption & Catalysis
 - Biomaterials & Engineering Applications
 - Novel Applications

FIELD TRIPS

- BR Refinery Plant, WA
- Perth Desalination Plant, WA
- Curtin University Laboratory Visit, WA
- ALCOA Refinery, WA
- Worsley Alumina, WA
- Tronox, Mine and Processing Plants, WA
- Werris Creek Mine, Natural Deposits, NSW

PARTNER PROGRAMS

- Shopping, Food & Wine Tours
- River Cruises
- Walking Tours
- Art & Culture Tours
- Heritage Precinct Tours
- Golfing
- Sailing
- Swimming with Dolphins
- Wildlife Parks

HOST CITY PERTH, WESTERN AUSTRALIA

Western Australia is adored for its brilliant blue skies, warm sunny climate and white sandy beaches. It is a land blessed with some of the world's most precious natural phenomena including the dolphins of Monkey Mia, the 350-million-year-old Bungle Bungle range and the towering Karri forests of the South West.

Spanning over 2.5 million square kilometres (1 million square miles), Western Australia extends into different climatic zones simultaneously. When it is warm and dry in the north of the State, it is cool and wet in the south - that is how big Western Australia is. Perth, the capital city of the State, is home to 1.38 million people and enjoys more hours of sunshine than any other capital city in Australia.

Sophisticated yet uncomplicated, the lifestyle in Western Australia is a relaxed one. Perth offers visitors a variety of multi-cultural restaurants, cafes, bars and nightclubs. Spend a day shopping, cruising on the Swan River, relaxing on a secluded beach, or play a round of golf on one of Perth's many courses. Take a day tour south to Wave Rock, north to the Pinnacles, or south to the Margaret River region. Rottnest Island also makes a wonderful day out, with pristine blue water, and long stretches of white sandy beaches. Spend a day exploring the island by bicycle, catch the bus or train tour and explore spectacular marine life. Bordered largely by desert to the east, Western Australia is bound by 12,500 kilometres (7,813 miles) of the world's most pristine coastline to the west.

The big variety of landscapes and climates in Western Australia means there is always plenty of sunshine, making it a perfect year-round destination. It is a land blessed with spectacular diversity where the deep reds of ancient interior rock formations contrast with the sparkling blue of the Indian and Southern Oceans and the lush greenery of the stunning southern regions.
